Chontains: carbanoy1-phosphate synthase (glutamine-hydrolyzing) (EC 6.3.5.5)
C;Species: Dictyostellum discoideum
C;Date: 08-Jun-1994 #sequence_revision 08-Sep-1995 #text_change 09-Jun-2000
C;Chocession: 237338
R;Elgar, G; Schofield, J.P.

F71215
hypothetical protein PH1990 - Pyrococcus horikoshii
C;Species: Pyrococcus horikoshii
R;Ravarabayasi, Y:; Sawada, M.; Horikawa, H.; Haikawa, Y.; Hino, Y.; Yamamoto, S.; Sr. M.; Ohiuku, Y.; Funahashi, T.; Tanaka, T.; Kudoh, Y.; Yamazaki, J.; Kushida, N.; Ogi NA; Ohiuku, Y.; Funahashi, T.; Tanaka, T.; Kudoh, Y.; Yamazaki, J.; Kushida, N.; Ogi A;Tilia Complete sequence organization of the genome of a hyper-thermophili A;Reference number: A71015
A;Accession: F71215
A;Coss-references: GB:AP000007; NID:93236134; PIDN:BA31117.1; PID:93258434
A;Experimental source: strain OT3
A;Note: this accession replaces an interim accession for a sequence replaced by GenB
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  RESULT 40
